

2001 Company
Wind Vented Roof Systems Since 1974

The roof photo above is of the Cocoa Beach Surf Company in Cocoa Beach Florida. The new roof is manufactured and warranted by the “**2001 Company**”. The installation was performed in September 2005 by Spilker Roofing out of Cocoa Beach Florida. The roof assembly consists of a two ply granulated modified bitumen over tapered insulating concrete.

The “**2001 Company**” issued a 20 Year Leak Warrantee, covering both material and labor, and a Hurricane Warranty covering wind speeds up to 120 mph.

The system was chosen by the owner due to it’s fast installation, superior wind resistance and self drying capabilities.
